SEAMLESS ROAMING WITH MAX-STREAM™ ROUTERS

LINKSYS | MAX-STREAM

Wi-Fi THAT FOLLOWS YOU

As devices* alternate between a traditional router and range extender, your home Wi-Fi signal can often experience lag or a dropped connection. But, when paired together with a Max-Stream™ router, your range extender uses Seamless Roaming technology so you can move freely in and outside of your home, connecting automatically to the strongest Wi-Fi signal.

Seamless Roaming technology is available on all Linksys Max-Stream™ routers

INTELLIGENT

Intuitively switches your device to the strongest Wi-Fi network.

RELIABLE

Ensures connection when roaming in and outside of your home without dropping a Wi-Fi signal.

CONVENIENT

Eliminate the need to switch between networks. Max-Stream™ router and range extender have one network name or SSID.
